**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 6/25/2007 has been entered.

***Allowable Subject Matter***

2. **Claims 3-51** allowed.
3. The following is an examiner's statement of reasons for allowance:
4. **Claims 3,4,6,28,43 and 50** recite a portable information processing apparatus comprising first and second movable parts that are mutually angularly displaceable, as is typically found in clamshell or flip phones. This feature is found in the Nagasawa reference (see Nagasawa, figures 1 and 2). The apparatus further comprises an inner operation section and an inner display section that is exposed when the apparatus is in the open condition. Nagasawa also teaches this feature (see Nagasawa, 8 and 10-14, figure 2B). The apparatus further comprises an outer operation section and outer display that is exposed when the apparatus is in the closed condition. This feature is also found in the Nagasawa reference (see Nagasawa, 4 and 5-7, figure 1B). The

apparatus further comprises a condition detector for detecting the closed or open condition of the apparatus. Nagasawa also teaches this feature (see Nagasawa, 27, figure 6).

5. **Claims 3,4 and 43** further recite an imaging section (a camera) provided in the exposed area of the apparatus during the closed condition. This feature is found in the Kawasaki reference (see Kawasaki, 22, figures 1C, 4B and 9 and paragraph 106). The imaging section takes an image in response to an input from one of the inner and outer operation section. Kawasaki also teaches this feature (see Kawasaki, paragraphs 106-110).

6. **Claims 3,4,6,28,43 and 50** further recite that the inner operation section is activated during the open condition and deactivated during the closed condition. The outer operation section is deactivated during the open section and activated during the closed condition. This feature is found in the Soini reference (see Soini, claims 11 and 13).

7. **Claims 3 and 43** is patentable over the prior art for reciting a controller for causing the inner display to display an image shot in response to an input from the inner operation section, and the outer display to display an image shot in response to an input from the outer operation section.

8. **Claim 4** is patentable over the prior art for reciting the image shot displayed on the inner display in response to an input from the inner operation section, and displayed on the outer display in response to an input from the outer operation section.

9. **Claim 6** is patentable over prior art for reciting the condition detector comprising a discrete contact section having two sets of discrete contacts in shape of comb teeth.
10. **Claims 28,43 and 50** is patentable over prior art for reciting an operation selector key for activating one of the inner and outer operation section and deactivating the other of the inner and outer operation section.
11. **All other claims** are dependent on claims 3,4,6,28,43 and 50 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mazda Sabouri whose telephone number is 571-272-8892. The examiner can normally be reached on Monday-Friday from 9:00-5:30.
